

Regeneron Greater Capital Region Science and Engineering Fair
Hosted by Rensselaer Polytechnic Institute and the Eastern Section of STANYS
Local Scientific Review Committee and/or Institutional Review Board
Regional SRC/IRB Form (B) – Due postmarked by 1/23/24

This completed form is required for ALL projects requiring IRB prior approval or for ANY project that is using a Local SRC. Send senior division form to: Mr. Nate Covert, 105 Mountainview Ave, Troy, NY 12180
 Send Junior Division form to: Ms. Donna Mooney, 228 Spring Ave., Troy, NY 12180

Local schools or school districts must review, in accordance with US federal law, any research project that involves human subjects, including surveys. This review needs to occur BEFORE research begins! The Greater Capital Region Science and Engineering Fair requires, in accordance with ISEF rules and any pertinent US, NYS, or local laws, that any project involving nonhuman vertebrates, pathogenic agents, controlled substances, recombinant DNA, or human/animal tissue, be reviewed by a Science Review Committee (SRC) prior to experimentation.

A Local Scientific Review Committee (Local SRC) may be formed in conjunction with the Institutional Review Board (IRB) and function as one group as long as all rules and requirements are met. Forming a Local SRC/IRB will expedite the prior approval and overall registration process.

I certify that the Local Scientific Review Committee and/or Institutional Review Board (listed below) met, reviewed and approved the research project (listed below) in accordance with the Intel ISEF rules.

[Local SRC/IRB Chair must also sign part 2 of each student's Approval Form (1B) - not part 3].
